

The world of mobility - welcome to Thyssenkrupp Access Solutions

Engineering Tomorrow Together

We specialise in transforming the vision you have of your home into reality.

Our home lifts offer a near-limitless number of options that allow you to hand-pick every colour, texture and accessory to make your home lift truly unique, reflecting your identity in every single detail.

Introducing the Altura by thyssenkrupp.

Our distinctive approach to offering the best solution for your home has led us to develop a truly global home lift. Available in a range of technologies, each widely used around the world, we are confident that we can offer you a configuration that will not only fit, but is right for you.

Security, reliability, and ease of use are the pillars of our design, which are delivered from the components we use and our attention to every single detail. Individual tailor-made projects that comply with the highest quality and safety standards, allow each cabin to feel unique yet familiar at the same time.

Altura

Elevator Technology

Living at its best.

Altura, a truly global home lift.

thyssenkrupp

Designed with you in mind

You can choose satin and scratch-resistant steel, or textured and plain finish modern walls, or opt for the vivacity of the infinite colours of the RAL range, in a game where releasing your imagination will be simple.

Have fun with the numerous combinations available.

With the thyssenkrupp home lifts, you can finally treat yourself to all the style and comfort that you want, enhancing your environment with an extremely captivating and contemporary design object.

Altura

You aspire. We deliver.

The Altura offers a wide range of materials and colours for the cabin walls. Further options are available as an optional

Altura specification

The closest thing to a elevator in your home

Technical compliance	Machine Directive 2006/42/EC EN81-41/SIL 3
Drive system	Gearless with cogbelt drive
Rated speed	0.15 m/s up to 0.50 m/s
Rated load	Up to 400 kg
Travel height	Up to 18,000mm
Number of stops	Max. 6 stops per lift
Number of doors	Max. 12 doors per lift
Pit	140 mm (no pit is required in case of threshold/ramp)
Shaft top height	2500 mm in existing shaft / 2600 with its own shaft
Platform control	Automatic (one-touch) with call reservation
Environment	Indoor / Outdoor
Emergency lowering	Battery operated emergency lowering
Control voltage	24V

Perfect synthesis between form and function.

Gulliver

Gulliver and Orion are elevators that adapt to your needs. Carefully designed layouts and high-tech components meet the criteria of absolute quality. With Gulliver and Orion you can finally treat yourself to all the style and comfort that you want, enhancing your environment with an extremely captivating and contemporary design object. Compact and functional, they are designed to be inserted in any environment because each elevator is custom designed and built.

Gulliver and Orion are available in two models, Orion for masonry shaft or Gulliver with a complete metal structure. Masonry shaft application allows you to camouflage the elevator leaving only the doors visible: sliding automatic or swing, blind or panoramic. The metallic structure will become an element of design within the environment. Inside and out, the hot galvanised structure, will withstand the most extreme environmental conditions.

Mobility that adjusts.

Gulliver & Orion

Energy efficient in use, you can of course use the lift to get not only you from one floor to another but also for shopping, laundry, furniture etc. Gulliver and Orion easily fit into an existing space, such as a closet or in the hall beside the stairs. Our individual solutions offer an ideal combination with your personal living concept, providing you an increased quality of life.

DATA SHEET ORION

Installation In masonry shaft with internally smooth shaft wall
Car layouts Platform with roof Basic cabin Cabin with automatic doors
Run Max 15.1 meters (platform only, cabin max 12 meters) Number stops max 6
Power supply 230 ± 10% V, 50 Hz single phase with ground conductor
Motor Single phase 230 V, 50 Hz; 1.8 -2.2 Kw
Capacity Max 400 Kg
Speed 0,15 m/s with soft start / stop
Guide T 70 section
Width Minimum wall 660 mm
Movement Lifting by means of hydraulic cylinder with stem and take-up chains
Controls "Hold to run" or "Automatic control" (enclosed cabins only)
Safety devices Emergency stop button on board Locks with safety switches for door closing Auxiliary electrical system in case of power failure with return to door and door release Instantaneous overspeed governor Load control device Limit switches with automatic door levelling
Compliance EC, TUV, corresponding to M.D. 236/89 EN 81-41* Machinery Directive 2006/42/EC EMSD Section E, Part 6* AS 1735, 15 Person restrict use non auto controlled AS 1735, 16 Person restrict use auto controlled AS 1735, 15-2002 *Hold to run only

DATA SHEET GULLIVER

Installation Shaft frame consists of cold folded galvanized steel Sheeting powder coated in RAL
Shaft Cladding Made with VISARM 10/11 shatter-proof glass or with blind panels
Car layouts Platform with roof Basic cabin Cabin with automatic doors
Run Max 15.1 meters (platform only, cabin max 12 meters) Number stops max 6
Power supply 230 ± 10% V, 50 Hz single phase with ground conductor
Motor Single phase 230 V, 50 Hz; 1.8 -2.2 Kw
Capacity Max 400 Kg
Speed 0,15 m/s with soft start / stop
Guide T 70 section
Width Minimum 730 mm
Movement Lifting by means of hydraulic cylinder with stem and take-up chains
Controls "Hold to run" or "Automatic control" (enclosed cabin only)
Safety devices Emergency stop button on board Locks with safety switches for door closing Auxiliary electrical system in case of power failure with return to door and door release Instantaneous overspeed governor Load control device Limit switches with automatic door levelling

Freedom and active living ...

Flow

Flow Stairlift fits most staircases, straight, around corners or even spiral, on either side of the staircase. This compact Stairlift looks simple on the outside but the technology on the inside is extremely ingenious.

Patented unique ASL (Advanced Swivel and Levelling) Technology allows an installation on the narrowest stairs while maintaining a comfortable chair size. With the arm and foot rests folded, Flow takes up little space when parked, and can even be parked "round the corner". Thanks to the vertical start options, Flow can also be used with only minimum space available in front of the first step, keeping doors and doorways free. Installed within a few hours, the Flow is your answer to years of freedom and extended quality of life.

The Flow stairlift has achieved many prestigious industry awards for design and innovation and is the number 1 stairlift in terms of quality and value for money.

- Adjusted to your height
- Patented Swivel Technology
- Discreet, foldaway design
- A range of upholstery options
- Quick and efficient installation

Thanks to proven monorail concept and patented ASL Technology the Flow rotates to the most optimal and safe position during the ride.

When the lift is folded up, there is still plenty of space for other stair users.

Different vertical start options enables installations even closer to doors.

Dimensions Flow

where not directly specified, measurements are in millimeters

... in your own
four walls.

Levant

Levant chairlift has been specially developed for straight staircases. With its modern chair and rail design and its reliable technology it is ideal for use in private households.

The entry model of the Levant chairlift range is introduced in 2008 and has been awarded with two design awards. A special Levant model for outdoor application is also available. With its reasonable price, Levant provides excellent value for money. Levant, standard equipped with manual swivel, has several options like padded seat, heavy duty drive, intermediate park position and a hinged rail.

- Space-saving folding seat
- Rail is fitted to the stairs and not on the wall
- Stable, ergonomically shaped arm rests with integrated retractable seatbelt
- Optional call and send stations
- Quick and efficient installation
- Outdoor model available

The hold-to-run joystick ensures easy and safe operation.

The aluminium rail has a slim design which gives the Levant a modern look. When the lift is folded up, there is still plenty of space for other stair users.

measurements are in millimeters

Remote call and send station with push button for more comfort.

The automatic hinged rail for installations close to doorways or corridors.
